Toronto, ON, Canada

EDUCATION

Bachelor's of Engineering(BEng) - *Software Engineering* SEPT 2021 - DEC 2025

York University, Toronto, ON

- **Capstone:** Designed a battery monitoring system with real-time temperature and impedance sensing. Implemented data analysis logic to enforce safety threshold and automate battery disconnection, while providing operators a GUI for manual monitoring and adjustable control settings.
- **Relevant Coursework:** E-Commerces Systems, Big-Data Systems, Data Mining, Mission Critical Systems, Machine Learning, Advanced Software Engineering

SOFTWARE DEVELOPMENT EXPERIENCE

Daily Puzzles, Personal Project DEC 2025 - PRESENT

- Developing a collection of puzzles as microservices which generate daily challenges and are served and played via WebSocket and HTTP, implemented in Go, JavaScript and HTML

Trading tool, Personal Project SEPT 2025 - PRESENT

- Created a desktop application which allows users to get insight on the value of their possessions using web scraping and data analysis

Workflow App, Personal Project MAY 2025 - PRESENT

- Created a SaaS application for tracking software projects, enabling both team and user authentication, cloud-based data storage and web access

Movie Recommendation Website, Group Project JAN 2024 - APRIL 2024

- Designed a movie recommendation website using React and Django which allows users to track watched movies and generates personalized recommendations using Machine Learning techniques

EXPERIENCE

Kidnasium, Program Coordinator APR 2022 - AUG 2023

- Developed and taught a summer-long program teaching youth ages 4 - 12. Including a partnership with Crestwood Summer Camp, where I Solely created and executed a "Ninja Training Bootcamp".
- Demonstrate strong communication skills when working with parents and providing updates on children's progression.

Elte, Stock Associate

SEPT 2019 - AUG 2021

- Took on additional responsibilities during organizational changes, contributing to showroom design maintenance, store layout updates and rebranding, and customer-facing sales operations outside of my original role
- Achieved single-customer earnings of \$30,000 by adeptly communicating and assisting customers in their shopping endeavors

Elections Canada, Assistant Material Coordinator

SEPT 2019 - OCT 2019

- Managed and distributed materials for the entire electoral district
- Collaborated with the district supervisor and other departments to ensure successful operations

TECHNICAL SKILLS

Languages: Python, JavaScript, GO, HTML, CSS, C++

Software: PostgreSQL, NOSQL, MongoDB, Postman, Linux, Windows, Redis, Cassandra

Tooling: Github/Git, Docker, pip, npm, Nvim, VSCode

INDEPENDENT LEARNING / TECHNICAL INTEREST

- ML and non-ML data analysis applications
- Distributed system backend architecture
- Low-level networking concepts and custom protocol design for closed network systems
