Toronto, ON, Canada

EDUCATION

Bachelor's of Engineering (BEng) - Software Engineering

SEPT 2021 - DEC 2025

York University, Toronto, ON

- **Capstone:** Built a Python battery monitoring system using Machine learning and data analysis for real-time temperature and impedance sensing, automated safety controls and an operator GUI, collaborating with engineering, stakeholders, and safety teams

TECHNICAL SKILLS

Languages & Frameworks: Go, Python, JavaScript/TypeScript, FastAPI, React, Next.js, HTMX

Cloud & Infrastructure: AWS (EC2, S3, Lambda), Docker, PostgreSQL, MongoDB

Testing & Data: Pytest, Selenium, Go Testing, Numpy, Pandas

SOFTWARE DEVELOPMENT EXPERIENCE

Daily Puzzles, Personal Project

- Designed and deployed a full-stack daily puzzle platform using JavaScript, HTML/CSS and a Go backend, serving dynamically generated puzzles to users
- Built RESTful APIs and WebSocket-based real-time update system to deliver daily content and synchronize user interactions
- Deployed application to AWS using a Dockerized backend for scalability
- Architected automated puzzle generation pipeline and scheduling system, enabling consistent daily content delivery without manual intervention

Workflow App, Personal Project

- Developed a full-stack workflow management application using Next.js and TypeScript as a lightweight alternative to Jira/Confluence
- Designed relational data models and implemented project-based data management using Node.js and PostgreSQL
- Established CI/CD pipelines with GitHub Actions, automating testing and deployment to reduce manual release effort and improve deployment reliability

Movie Recommendation Website, Group Project

- Built a Machine Learning-driven recommendation system using Python, NumPy and Pandas to generate personalized movie suggestions based on user behaviour
- Planned and Created a SQL and MongoDB database to manage user accounts, movie metadata, rating history
- Developed a FastAPI backend service for prediction and data processing, integrating ML outputs into a user-facing application
- Deployed to the cloud and collaborated with others using Git Actions to enable automated deployment and ML tasks

EXPERIENCE

Kidnasium, Program Coordinator

APR 2022 - AUG 2023

- Developed and taught a summer-long program teaching youth ages 4 - 12. Including a partnership with Crestwood Summer Camp, where I Solely created and executed a "Ninja Training Bootcamp".

Elte, Stock Associate

SEPT 2019 - AUG 2021

- Took on additional responsibilities during organizational changes, contributing to showroom design maintenance, store layout updates and rebranding, and customer-facing sales operations outside of my original role
